

INDEX OF AUTHORS' NAMES.

ABSTRACTS. 1891.

And also to Transactions. 1891 (marked TRANS.); and to such papers as appeared in the Proceedings during the Session 1890—1891 (Nos. 87 to 100; Nov., 1890, to July, 1891), but not in Transactions (marked PROC.).

A.

- Aegg, R., derivatives of chrysene, 730.
 Abel, J. J., benzylidenebiuret and chlorobenzylidenethiobiuret, 702.
 Abeles, M., estimation of sugar in blood, 1399.
 Adam, G. See Ladenburg.
 Adeney, W. E., gas apparatus, 240.
 Adermann, F., alkaloids of *Corydalis cava*, 1266.
 Adie, R. H., a direct comparison of the physical constants involved in the determination of molecular weights by Raoult's method, *PROC.*, 1891, 26.
 — compounds of the oxides of phosphorus with sulphuric anhydride, *TRANS.*, 230.
 — osmotic pressure of salts in solution, *TRANS.*, 344.
 Ahrens, F. B., γ -dipyridyl and γ -dipiperidyl, 1093.
 — sparteine, 842.
 Aignan, combinations of tartaric acid and potash or soda in solutions, 1019.
 — constitution of aqueous solutions of tartaric acid, 1018.
 Albertoni, P., action of sugars in the body, 1526.
 Allen, E. W., and B. Tollens, wood sugar (xylose) and wood gum, 659.
 — — xylonic acid, 668.
 Allendorff, O., phthalaldehydic acid, 1369.
 Allihn, F., rise in the zero point of thermometers of Jena glass, 8.
 Amagat, E. H., compressibility of gases: results with oxygen, hydrogen, nitrogen, and air, 378.
 Amat, L., conversion of sodium pyrophosphite into phosphite, 799.
 — conversion of sodium pyrophosphite into sodium hydrogen phosphite, 641.
 — estimation of hypophosphorous, phosphorous, and hypophosphoric acids, 243.
 Ames, J. S., relations between the lines of various spectra, 1.
 — some gaseous spectra: hydrogen, nitrogen, 1.
 Amoretti, G. See Fileti.
 Amthor, C., and G. Müller, dry distillation of terpenylic acid, 79.
 Anderlini, F., derivatives of cantharidin, 1243.
 Anderson, W. S. See Irvine.
 André, G., ammonical mercuric chlorides, 986.
 — some compounds formed by mercuric chloride, 1030.
 André, G. See also Berthelot.
 Andreae, J. L., constant vapour pressure, 781.
 Andres, H., spectroscopical properties of Russian oil of peppermint, 2.
 Andrews, L. W., detection of conine in a case of poisoning, 871.
 Andrews, T., passive state of iron and steel, 250.
 Angeli, A., action of carbamide on benzile, 726.
 — action of ethyl oxalate on acetothienone, 550.
 — action of nitric acid on acetylacetone, 890.
 — eulyte, 889.
 Angeli, A., and G. Ciamician, oxidation products of brominated thiophens, 427.
 Angeli, A. See also Ciamician.

- Ankersmit, H. J. See Pictet.
- Anschütz, R., amic and anilic acids of fumaric acid and maleic acid, 176.
- diglycollic anhydride, 177.
- identity of pyranilpyroinlactone and citraconanil, 73.
- so-called phenylketohydroxydimethylanilidotetrahydropyridinecarb-oxylic lactone: β -anilidoglutaranil, 741.
- Anschütz, R., and C. Beavis, dichloromaleinanil chloride, 1047.
- Anschütz, R., and P. Bendix, diphenylsuccinic acids, 71.
- Anschütz, R., P. Bendix, and W. Kerp, mesitene lactone and isodehydracetic acid, 172.
- Anschütz, R., and W. Berns, diethylcarbobenzoic acid, 913.
- Anschütz, R., and H. Geldermann, action of carbamide and thiocarbamide on dihydroxytartaric acid, benzile, and benzoïn, 725.
- Anschütz, R., and H. Weyer, action of aniline on chloride and bromide of arsenic, 901.
- Antoine, C., vapour pressure of water up to 200 atmospheres, 1407.
- Antony, U., and A. Lucchesi, auric sulphide, 526.
- Araiki, T., formation of lactic acid and glucose in the organism, 1125, 1392.
- Arata, P., and C. Gelzer, morrenine, 1122.
- morrenole, 1088.
- Argutinsky, P., excretion of nitrogen in sweat, 350.
- the Kjeldahl-Wilfarth method, 362.
- Armsby, H. P., and W. H. Caldwell, maize dried in the field and as silage, 359.
- Armstrong, H. E., terpenes and allied compounds: the nature of turpentine oils, including that obtained from *Pinus khasyana*, TRANS., 311.
- the formation of sulfs—a contribution to the theory of electrolysis and of the nature of chemical change in the case of non-electrolytes, PROC., 1891, 118.
- the function of chlorine in acid chlorides as exemplified by sulphuryl chloride, PROC., 1891, 60.
- theory of solution, 788.
- Armstrong, H. E., and W. J. Pope, terpenes and allied compounds; sobrerol, a product of the oxidation of terebenthene (oil of turpentine) in sunlight, TRANS., 315.
- Armstrong, H. E., and E. C. Ros-siter, a new method of preparing nitro-derivatives: the use of nitrogen dioxide as a nitrating agent, PROC. 1891, 91.
- Armstrong, H. E., and E. C. Ros-siter, bromo-derivatives of β -naphthol, PROC., 1891, 87.
- chloro- and bromo-derivatives of naphthol and naphthylamine, PROC., 1891, 32.
- the action of nitric acid on naphthol derivatives as indicative of the manner in which nitration is effected in the case of benzenoid compounds generally; the formation of nitro-keto-compounds, PROC., 1891, 89.
- Armstrong, H. E., and W. P. Wynne, studies on the constitution of tri-derivatives of naphthalene. No. 9. Andresen's β -naphthylaminedisulphonic acid, PROC., 1891, 27.
